

# CD TYPE WIRE ROPE HOIST

Material: High quality alloy steel

Application scenarios: widely used in shipbuilding, electric power, transportation, construction, mining, post and telecommunications and other industries

Quality inspection: Light load test Heavy load test Broken test

Certification: CE certification

Packing and shipping: wooden case

After-sales service: our company is responsible for the quality of each batch of goods, we promise that each batch of goods can be tracked, service to customer satisfaction

1. The motor adopts conical rotor motor, which integrates power and braking force.
2. The hook is made of high strength steel and equipped with locking device;
3. Equipped with overload, over current, loss of pressure, break equal protection functions;
4. Power supply is applicable to a wide range, using 36V safe voltage control, can be divided into wireless and wired control, so that the operation is safer;
5. The brake material without asbestos and other ingredients makes the product more environmentally friendly.
6. Varieties and specifications, lifting and running speed selection range is wide;
7. Compact structure, smooth operation;
8. High cost performance, easy to use;
9. Strong versatility of parts;
10. Manual trolleys and electric trolleys at different speeds can be selected;
