

VERTICAL PLATE CLAMP

Plate lifting clamps are part of our lifting equipment range and designed for lifting and transferring plates such as steel sheets and other similar materials. These plate clamps can be used to safely and securely move plates horizontally or vertically. This lifting tool is ideal for manufacturing and other industrial settings. The integration of the Lifting beam, Vertical clamps along with crane hooks form an ideal solution for the present day industry.

HORIZONTAL PLATE CLAMP

Rang 1 – 10 Ton

A horizontal lifting plate clamp is a mechanical device designed to lift and transport steel plates in a horizontal direction. It is commonly used in industries such as [manufacturing](#), [construction](#), and [logistics](#) for handling heavy loads of steel plates, and provides a safe and efficient method for lifting and moving plates.

UNIVERSAL PLATE CLAMP

Universal Vertical Lifting Clamp is suitable for the lifting and vertical transfer of single steel plates. our firm has been committed to provide a quality tested assortment of **Universal Plate Lifting Clamp**. This clamp is precisely manufactured using high quality metal alloy with the aid of ultra-modern methods at our premises. The offered clamp finds its application in lifting machines for connecting grab hook and pulley chain. Beside this, we put forth this **Universal Plate Lifting Clamp** in several dimensions at viable rates to the patrons.

Rang 1- 10 Ton

PIPE CLAMP

[Pipe clamps](#), or pipe fixings, are best defined as the support mechanism for suspended pipes, whether that be horizontal overhead or vertical, adjacent to a surface. They are vital in ensuring all pipes are fixed securely while also allowing for any pipe movement or expansion that may occur.

Pipe clamps come in many variations as the requirements for pipe fixing can range from simple anchoring in place, to more complex scenarios involving pipe movement or heavy loads. It is essential that the right pipe clamp is used to ensure the integrity of the installation. Pipe fixing failure can cause significant and costly damage to a building so it is important to get it right.

BEAM CLAMP

URBANLIFT CLAMP beam clamp provides a quick and versatile rigging point for hoisting equipment, pulley blocks or loads and comes complete with a locking device. The unit offers flexible applications, due to the wide adjustment range. The central threaded spindle allows easy attachment and a safe and secure grip to the beam flange.
